SUMMARY

Detail-oriented and proactive QA Engineer with 3.5+ years of experience in functional and non-functional testing across agile environments. Adept at understanding business requirements, designing and executing test cases, identifying bugs, and collaborating with cross-functional teams to ensure high product quality. Experienced in SDLC/STLC, and comfortable with dynamic, fast-paced projects. ISTQB certified with a strong foundation in both manual and automation testing.

SKILLS

- **Testing Types:** Functional, Smoke, Sanity, Regression, Usability, Accessibility, Performance
- **Programming Languages**: Java, HTML, CSS.
- **Test Automation**: Selenium WebDriver
- **API Testing**: Postman, Rest Assured
- **Test Frameworks**: TestNG
- **CI/CD Tools**: Jenkins
- **Defect Tracking & Test Management:** JIRA, TestRail
- **Database**: MySQL
- **Others:** Agile/Scrum, STLC, SDLC

CERTIFICATIONS

- ISTQB Foundation Level Certification

PROFESSIONAL EXPERIENCE

IGT Solutions Pvt Ltd, Pune   March 2022 – Present
Software Test Engineer

- Designed and executed detailed manual and automated test cases for web applications across multiple browsers using **Selenium WebDriver**, **TestNG**, and a **Hybrid Framework**.
- Performed **regression**, **functional**, **smoke**, **usability**, and **UAT testing**, ensuring high-quality user experience, and contributing to the successful delivery of **5+ major releases**.
- Collaborated closely with QA leads to derive test scenarios from business requirements and user stories, aligning test coverage with key functionality.
- Logged and tracked defects using JIRA, retested promptly after fixes, and maintained comprehensive defect and test summary reports using **MS Excel**.
- Participated in **Agile ceremonies** and supported **accessibility** and **performance validation** during UAT and pre-release phases, ensuring readiness for production rollout.

EDUCATION

Bachelors' degree in Computer Science   June 2018-June 2022
